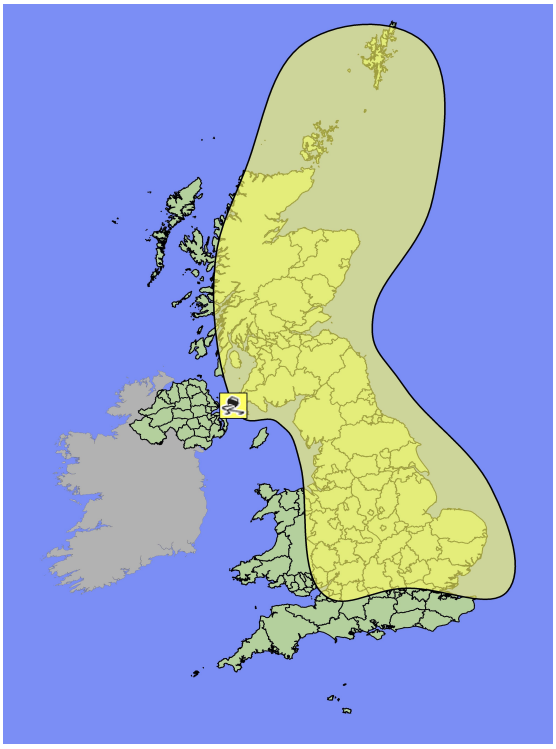
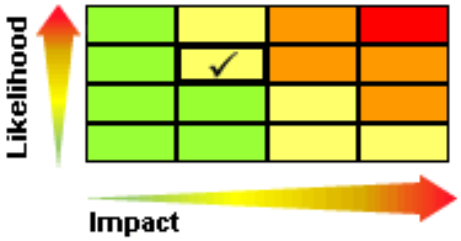
National Severe Weather Warning Service





Chief Forecasters Assessment
Outbreaks of rain, with sleet or snow in places, will arrive over the north of Scotland on Friday afternoon and will then continue to spread southwards through Friday night and Saturday morning to reach much of northern England by dawn Saturday. In the west mainly rain will fall but over central and eastern parts some sleet and snow is expected. There is a risk of a few centimeters of snow accumulating in places.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **15:00 on Fri, 30th Nov 2012** until **12:00 on Sat, 01st Dec 2012**

A combination of low temperatures and a mix of rain, sleet and snow will lead to the risk of icy patches on untreated surfaces.

The public should be aware of the risk of ice and locally some snow covered surfaces.
